

Aprosoft Consulting and Training Ltd.

JOB POSTING FOR IMMEDIATE HIRE

Job Title: Salesforce Developer / Administrator

Number of Vacancies: 4

Aprosoft is actively expanding its existing Salesforce team with new opportunities for Admins and Developers. There are multiple open positions for experienced mid-level resources and technical leads who are certified in Salesforce. These openings are for long term projects with US based customers with opportunity to work with the latest Salesforce based technologies. If you have strong communications skills in English and have the confidence and expertise to work with challenging and engaging projects, then we invite you to apply for our Salesforce positions.

Aprosoft is a fast-paced organization with tremendous opportunities to learn and expand your skills in a friendly and caring work environment.

Job Responsibilities

- Building Salesforce applications/frameworks using Apex, Visualforce, Lightning Component Framework (Aura and LWC) and leveraging the full capabilities of the Salesforce platform to support the program
- Managing multiple Salesforce instances.
- Managing Salesforce roles, profiles, sharing rules, Trigger, Email Template, Email Alerts, Flows, Workflows and groups
- Capable of Managing Salesforce Territory Model and various Access permissions
- Importing sales department leads, contacts, and other custom object data using Data Loader
- Maintaining the sales cloud, as well as building custom reports and dashboards.
- Implementing solutions that adhere to Salesforce platform best practices and perform peer code reviews
- Collaborating with Scrum Teams to estimate, plan, and manage new feature development and testing
- Working with team members to analyze business requirements, translating those requirements in to customized solutions that are highly scalable, extensible, and easy to maintain while keeping the overall end-user experience in mind
- Providing system administration support to customized applications, user permissions, security settings, custom objects, and workflow
- Assisting with in-depth analysis of technical problems, suggesting short- term and long-term resolutions and an overall roadmap for the completion of this process
- Supporting post deployment activities including knowledge transfer, process documentation and application bug fixes.
- Preparing reports for Sales and other departments in Tableau.
